

Retrofitting of Social Housing: Opportunities from the Intelligent Energy Europe – Programme

Paula Cadima

European Commission – Intelligent Energy Executive Agency (IEEA), Brussels, Belgium

ABSTRACT: The presentation is divided in two parts. The first part gives an overall introduction of the Intelligent Energy Europe-Programme highlighting what it supports and which actions may be funded with a main focus on the key action «Retrofitting of Social Housing». The objectives and scope, target areas, priority topics, relevant definitions and expected results will be explained. The second part will show concrete examples and some results of ongoing projects. These will cover various areas, such as awareness raising, education and training, overcoming existing barriers in low income and social housing, tailored financing schemes, asset management tools, advanced integrated retrofitting solutions and methodologies for decision making.

Keywords: energy efficiency, social housing, retrofitting
