Urban design for an inclusive economy

publishing

Proceedings of the Institution of Civil Engineers

Urban Design and Planning THEMED ISSUE

Champion Editors: Hendrik Tieben, Associate Professor, The Chinese University of Hong Kong, Hong Kong SAR, The People's Republic of China and Henco Bekkering, Professor, TU Delft, Delft, Netherlands

Urban Design and Planning is proposing a themed issue for 2019 on Urban design for an inclusive economy.

This themed issue explores relationships between urban form and economic opportunities. We invite papers that address how such relationships can be measured and (re-)designed to help create a more inclusive economy with opportunities for businesses, by individual people or collectives, across different scales. Such investigations may include for instance the study of urban areas with formal as well as informal business clusters, arrival districts and migrant entrepreneurs, and areas attracting innovative start-ups and social enterprises. In addition to proposals for academic papers, related urban design projects can also be submitted.

Topics to be covered/questions asked could include the following.

- Urban design
- Creating urban prosperity
- A more inclusive economy; this special issue is aligned to the core commitments of the New Urban Agenda of UN Habitat (adopted in 2016) and the upcoming 10th IFoU Conference "The Entrepreneurial City" at the Chinese University of Hong Kong (<https://ifou2017.com>)

Practitioners and researchers engaged in any of these questions/topics are invited to submit abstracts by January 2018. Relevant papers outside the themes outlined above will also be considered. The deadline for manuscripts is April 2018.

Why publish with ICE?

ICE publishing has been uniting research and practice in engineering and science since 1836. As the publishing arm of the Institution of Civil Engineers, we provide exclusive access to over 80 000 active ICE members in 160 countries.

By publishing with ICE, you will benefit from our quality, visibility and advocacy.

QUALITY

- Rigorous blind peer review by an international panel of experts.
- Author editorial support and guidance to help you develop your work.
- Professional copy editing, typesetting and proof-reading services.
- No publication charges, it is entirely free to publish with us (open access titles excepted).

VISIBILITY

- Our journals are included in major science and engineering databases and indexes, making our articles easily discoverable in Google and scholarly search engines.
- In addition to ICE members, our content is read by academics and practitioners at over 1500 subscribing universities, corporations and government agencies around the world.

ADVOCACY

- We work closely with our authors and editors to promote our journals to all relevant audiences, at international conferences and through engineering social networks.

Invitation to authors

To submit your abstract or request further information, please contact
